Projects

[Quickstretch.app](#)

- Exercise web app, aimed to improve visitors' well-being through stretch routines
- Utilized TypeScript for enhanced code quality, Vite for optimized performance and Styled-Components for a user-friendly interface
- Features custom illustrations created by myself

[Portfolder](#)

- Compact portfolio builder for illustrators, photographers, and other visual creators or curators
- Enabled users to display work via image links, eliminating the need for image collection, upload and storage, allowing for fast page startup
- Used NextJS with Javascript, Tailwind for easy styling and Firebase for backend services

Work Experience

Freelance Web Developer (2023 to Present)

- Worked with local business to create brand website (boulangerie.kg), increasing its visibility and customer engagement
- Drove substantial regular monthly traffic of over 1000 unique visitors, leading to increased customer interest and higher sales
- Used modern libraries and frameworks (NextJS, React, Sass, Tailwind, Figma, Vite) to create visually appealing and user-friendly websites, continuously engaging in self-learning of the latest web development technologies

Freelance Copywriter (2015 to 2023)

- Areas of work include journalism, political analysis, political campaigning, technical documentation and promotional writing
- Engaged in content localization (between English, Russian and Kyrgyz languages), contributing to readership engagement growth

Freelance Illustrator (2015 to 2024)

- Produced licensed artwork for Disney, Cartoon Network and more
- Achieved recognition for illustration and character design and was featured in multiple publications (including the Warner Bros. blog, ComicBook.com and others)
- Worked with hundreds of clients and brought their characters and ideas to life
